PATIENT INSTRUCTIONS

AN INFORMATION PACKET CAN BE RECEIVED VIA EMAIL

Please Remember

Confirming your identification is essential to ensure accurate medical records and for your protection and security.

You will be asked EACH VISIT to provide a VALID HEALTH CARE CARD and PICTURE ID.

If you do not have your card you may be asked to return for your examination.

Please bring your requisition with you.

Please notify reception if you are diabetic.

Patients suspecting pregnancy should consult their physician before exam date.

You are required to give our office 3 business days notice if you need to cancel or reschedule the appointment(s).

There are no restrictions to your diet; you may eat and drink before your procedure.

Note that we advise against corticosteroid injection within two weeks (14 days) of any vaccination.

If you have an upcoming vaccination following your corticosteroid procedure, the vaccination should be scheduled two weeks (14 days) from the last dose of corticosteroid.

Please call the booking line if you have had a vaccination within 14 days of your corticosteroid injection, the appointment may need to be cancelled.

Call (403) 244-3700 press 1 to confirm appointment(s).

Transportation

If you are having a procedure involving the neck, SI joints, muscle blocks, or nerve blocks in the spine, we ask that you make arrangements for transportation as you will not be able to drive after your procedure for the rest of the day. There are several other procedures which will require alternate transportation arrangements (alternate driver, bus, or cab, etc) as you will not be able to drive for the rest of the day after your procedure. Your appointment will be re-booked for these procedures if you do not have a driver. There are other procedures however, which do not require a driver and you will be allowed to drive after the procedure. Please refer to the email patient advice you received when your appointment was booked. If you did not receive this email, please call 403-244-3700. If you are having a procedure involving Thoracic Facet Injections or Pars Block Injections, a driver is not required.

Antibiotics & Infection

Please note that we will not be able to continue with your procedure if you have an active infection or are on antibiotics. The medication (cortisone) we use will reduce the effectiveness of the antibiotics. If you are on antibiotics, please call our booking line at (403)-244-3700.

Pain Medications

Please do not stop any pain medication that has been prescribed by your doctor without consulting him or her first.

Please reduce any over the counter pain medication (Advil, Tylenol, etc.) the day of your appointment, so that you have enough discomfort (but not extreme) to determine if your procedure has been effective in relieving your symptoms. If you are in pain despite your medications, you do not need to decrease them.

Anticoagulants (Blood Thinners)

If you are taking anticoagulants and must temporarily discontinue them for a procedure, we will need authorization from your doctor before an appointment can be made, which will be arranged by the department. Patient can resume blood thinner on next scheduled dose. Anticoagulation Hold Protocol: Lixiana (Edoxaban): Discontinue 2 days prior (3 days including day of procedure), Pradaxa (Dabigatran): Discontinue 2 days prior (3 days including day of procedure), Xarelto (Rivaroxaban - factor Xa inhibitor): Discontinue 2 days prior (3 days including day of procedure), Eliquis (Apixaban - factor Xa inhibitor): Discontinue 2 days prior (3 days including day of procedure), Persantine (Dipyridamole): Discontinue 4 days prior (5 days including day of procedure), Plavix (clopidogrel bisulfate): Discontinue 5 days prior (6 days including day of procedure), Aggrenox: Discontinue 3 days prior (4 days including day of procedure), Brilinta (Ticagrelor): Discontinue 5 days prior (6 days including day of procedure), Heparin- Lovenox (Enoxaparin), Fragmin (Dalteparin), Innohep (Tinzaparin), Fraxiparine (Nadroparin): Discontinue 24 hours prior; Warfarin/Coumadin: Discontinue 5 days prior (6 days including day of procedure) – INR required day prior NOTE: INR must be < 1.4.

*Not all treatments provided at the clinic are covered by Alberta Health. Some injectables come at a cost. For your convenience majority of the injectables can be purchased at EFW Radiology Cambrian at competitive pricing. Some injectables will be required to be purchased at a pharmacy prior to the appointment, with a prescription from your physician. These details will be discussed at the time of booking.
